Serving with Campus Crusade for Christ

Keeping Up With the Daleys

- **Marshall**— I am about to begin my last semester of college classes. I'll be taking advanced illustration and advanced graphic design. I am beginning the semester working on a project to design a menu board for one of the Disney restaurants. Please pray that I do well and that I am able to balance my work and school time.
- **Elaine & Corey**- Praises that we are forming a small community of those who work at Rawhide and we are the surrogate family for people. Prayer for the Ranch that we can continue to make progress on improving the program, facility, and enrollment.
- **Tim & Judy**— the next few weeks promise to be very busy for us. We'll also be attending a week long training with FamilyLife in preparation for the upcoming conference season. Pray that we are well prepared for serving.
- We are mourning the loss of Judy's brother, James Campbell. Jim had been in a care facility for the past year due to a debilitating brain condition which prevented speech and affected his balance. Jim went home to be with the Lord on November 24 and we made a quick 3 day trip out for the services in Modesto. Pray for our family, especially Jim's wife, Helena, as we grieve our loss.

James Mark Campbell

1923-2007

VITAL SYSTEMS ARE ALWAYS THERE – EVEN WHEN WE'RE NOT

The computer systems that we support at Campus Crusade for Christ's headquarters in Orlando are used around the clock by people all over the world. There is probably no day and no time when someone is not connected and doing something.

For instance, Campus Crusade offices in Hungary, Italy, and Australia have their email boxes hosted at our facility. Our office in Moscow hosts their own, but routes their email through our systems.

Our staff members often keep late hours out ministering to college students, and sometimes sit down at their computers after they get home. They access the systems in Orlando for email, checking their ministry accounts, and other things vital to their ministries. U.S. staff members travelling overseas or on international assignment also access the systems in Orlando.

Ministry partners can log on to Campus Crusade's donations web site, give.ccci.org, and set up online donations from their credit cards or checking accounts. We've been surprised to find that quite a few ministry partners like to give donations in the middle of the night!

Last but not least, seekers looking for answers and Christians seeking discipleship help can get to our ministry web sites any-time day or night.

As you can see, it is critical that these systems and web sites are available 24 hours a day, every day of the week. Most of us in Orlando keep normal daytime work hours Monday through Friday. So, what happens if something goes wrong when we're sleeping?

We've tried over the years to put some things in place to monitor our systems and alert us of problems through our cell phones, and it has worked well on the lim-

ited systems where we've been able to do it but we have not been able to monitor all our systems this way.

Tim is involved in a project right now to correct that. We've purchased software that can collect information from all of the various components of our systems. It can also mimic the things that our users do and make sure we get the expected results. With this new tool, we hope to discover problems before our users do and get them fixed as quickly as possible. Even if something happens in the middle of the night, the proper administrator can be awakened by a cell phone, connect by computer from home, and in most cases, correct the problem right away.

At peak times for our ministries we have tracked an increased number of system failures which keep staff and donors from accessing information or services. We recognize that these are attacks on our systems. The enemy would like to hamper our capabilities and thus thwart the ministry. With this new technology we may even be able to identify and correct a problem before anyone else knows It has occurred.

We are excited about being able to help implement this new tool. It will enable us to make sure that our staff and ministry partners will not be hindered in their ministries. Anytime, day or night, they will have ready access to the things they need to help fulfill the Great Commission.

Thank you for the part you play in reaching the lost for Christ through your support of us.
